Reverse Integrity Gaskets

Reverse Integrity Gaskets  
for raised face flanges

# KLINGER SENTRY RTJ

## Reverse Integrity Gaskets

A safe, high integrity seal that provides operators with the ability to test the integrity of a bolted connection. The Sentry helps reduce the need to involve large volumes of nitrogen and reduce down time whilst performing integrity and pressure tests, maximising plant up time and efficiency.

### APPLICATIONS

- » Designed to suit ASME B16.5, API 6A & API 17D Flanges
- » Subsea and Topside
- » Available as Octagonal, Oval, RX and BX cross-sections

### ASSOCIATED EQUIPMENT & SERVICES

Sentry Test Plug

Sentry Test Pump

Gasket Insertion Tool
